

Sturtevant Balanced Rolls

For Laboratories or small scale production plants.

- ❖ **Balanced Rolls** – recommended for high speed crushing where uniform and clean granular product with minimum of fine powder is required.
- ❖ **Efficient reduction** – of both hard and soft materials down to approximately 300 micron and below.
- ❖ **Heavy Duty** – manganese or chrome steel roll shells.

Typical applications for **Balanced Rolls**:

Basalt	Brick
Carbide	Cast Iron Grit
Chrome	Cinders & Clinker
Ferro-Manganese	Ferro- Silicon
Ferro-Titanium	Granite
Glass	Limestone
Magetite	Manganese
Pirites	Quarts
Sandstone	Silica Rock

Machine Sizes	203 x 127	305 x 254	Other Sizes Available
Typical Power Requirement	1.5kw	6kw	Up to 15kw

Machine capacities will depend upon material input size, required fineness, moisture or oil content, system design and control.
